Ajman University Organizes an Online Art Exhibition Entitled Expressionism Using AI

In the academic year 2025, Ajman University through the College of Humanities and Sciences has launched an innovative online art exhibition titled "Expressionism Using AI". This initiative promotes inclusive and equitable learning opportunities by integrating digital literacy and creative skills development into the Introduction to Arts course.

Through the use of AI tools, students engage in experiential and student-centered learning, applying artistic principles such as color and contrast while exploring expressionism as a form of self-expression, emotional awareness, and cultural understanding. The project fosters critical thinking, innovation, and interdisciplinary learning, enabling students to merge technology with artistic practice. By encouraging learners to create original works through descriptive prompts, the exhibition highlights the importance of relevant skills for the digital age, preparing students for evolving creative industries while enhancing lifelong learning competencies.

Ajman University Serves the Public Through Its Library Resources

In the academic year 2025, Ajman University Library continued to strengthen its commitment to inclusive education and lifelong learning by extending access to its free library resources to the wider community. Ajman University Library provides membership opportunities for residents, school students, researchers, and government employees, enabling equitable access to both physical and digital academic collections.

In addition to resource access, the library offers dedicated learning spaces, free internet-enabled study environments, and community-focused initiatives such as educational workshops and book donation activities. These services support continuous learning, knowledge development, and community engagement beyond the university setting.

Through these initiatives, Ajman University promotes open access to academic resources and fosters a culture of lifelong learning, reinforcing its role as a knowledge hub that serves both the academic community and the broader public.

Ajman University Expands Access to Industry-Integrated Learning Through Healthcare Leadership Engagement

In February 2025, as part of its commitment to providing inclusive, high-quality, and industry-relevant education, Ajman University organized an Industry-Integrated Experiential Learning visit for students to the headquarters of Leader Healthcare in Abu Dhabi. The initiative was designed to expand access to practical educational opportunities that complement academic learning and strengthen students' readiness for future careers in the healthcare sector.

Ajman University organized by the General Education Program at the College of Humanities and Sciences, the visit provided students with direct exposure to healthcare leadership, innovation, and private-sector operational practices within a real-world professional environment. Through interactive sessions and a specialized leadership induction program, students gained valuable insights into healthcare management, strategic decision-making, and emerging trends shaping the future of healthcare services.

The initiative reflects Ajman University's commitment to widening access to transformative learning experiences that enhance student engagement, professional awareness, and applied knowledge beyond the traditional classroom setting. By connecting students with healthcare industry leaders and workplace environments, Ajman University continues to strengthen equitable access to career-focused education and experiential learning opportunities that support academic success and long-term employability. Through such collaborations, Ajman University reinforces the efforts to bridge academia and industry through educational partnerships that foster innovation, practical skill development, and workforce preparedness. Such initiatives play an important role in preparing graduates to contribute effectively to the healthcare sector and broader community development.

Through industry-integrated educational experiences, Ajman University continues to promote accessible, future-focused learning opportunities that empower students with the knowledge, competencies, and professional exposure needed to thrive in a rapidly evolving global workforce.

Ajman University Shared its Resources Through the Table of Happiness

In March 2025, Ajman University hosted the Table of Happiness initiative, organized by the Office of Student Life in collaboration with the Youth Initiative Club, Dental Anastomosis Club, Book Club, and Biomedical Engineering Club. The initiative demonstrated Ajman University's commitment to making its campus resources, healthcare services, professional expertise, and educational facilities accessible to the wider community, particularly vulnerable children, while promoting lifelong learning, health awareness, and social well-being for all. The event began at Ajman University's dental clinic, where orphaned children received dental examinations conducted by dental professionals. Identified dental concerns were documented to facilitate follow-up care, demonstrating how the university leverages its clinical facilities, staff expertise, and healthcare resources to support community health beyond its campus population. The children also attended an educational lecture in one of the university's lecture halls, where they learned about oral hygiene, preventive dental care, and healthy daily habits. By opening its clinical and educational facilities to community members, the university transformed its institutional resources into opportunities for public health education, knowledge sharing, and lifelong learning. The programme continued with recreational activities in the university's playroom, followed by a communal breakfast with doctors, volunteers, and other participants. Gifts, cash donations, and toys were distributed at the conclusion of the event, fostering inclusion, social connection, and community support. Through the Table of Happiness initiative, Ajman University highlighted its role as an educational resource, extending the benefits of its campus infrastructure, dental clinic, qualified personnel, and educational facilities beyond its immediate university community. The initiative reflects the principle that university resources can serve a broader public purpose by supporting access to healthcare, sharing practical knowledge, and creating inclusive learning opportunities for people of different backgrounds and circumstances.

Ajman University Extends Free Educational Resources and Academic Learning Opportunities to High School Students

In May 2025, as part of this commitment, the Department of Sociology hosted a special edition of its Graduate Project Discussions, welcoming four outstanding final-year high school students to participate in a master-class-style academic experience. Ajman University continued to support lifelong learning by extending access to its academic knowledge, educational experiences, and learning opportunities to students beyond its enrolled university community. Through initiatives that welcome prospective learners into university-level academic activities, Ajman University promotes knowledge sharing and helps make higher education learning experiences accessible to the wider community. The initiative provided these external learners with an opportunity to attend university-level project presentations, observe academic discussions, and gain exposure to sociological research and scholarly knowledge sharing. By opening this academic activity to high school students, Ajman University made its educational expertise and learning environment available to individuals who had not yet enrolled at the institution. The experience enabled participants to explore research-based learning, develop an understanding of academic inquiry, and gain insight into the expectations and opportunities associated with higher education. To formally recognize their participation, the **four (4) visiting students** received certificates of participation awarded by the Dean of the College of Humanities and Sciences. These certificates documented their engagement in the academic learning activity and acknowledged their participation in an educational opportunity provided beyond the University's enrolled student population. The initiative demonstrates how Ajman University can share its academic resources, expertise, and learning opportunities with prospective students, supporting educational progression and encouraging continued learning. By connecting secondary education with university-level academic experiences, the Department of Sociology contributes to a culture of lifelong learning and broader access to knowledge for all.

Ajman University Opens Its Healthcare Resources to the Community Through Free Medical Screening and Health Education

In September 2025, Ajman University, through its Office of Medical Services and in collaboration with Thumbay Labs, organized a **two (2) day** Free Medical Camp on campus, extending Ajman University's healthcare resources and facilities to the wider community at no cost. The initiative provided approximately **800 community members** and their families including faculty, staff, students, facilities personnel, and security guards with access to preventive health screening and health awareness activities.

The camp offered free Complete Blood Count (CBC), blood sugar, cholesterol, and Vitamin D testing, alongside height, weight, and blood pressure monitoring. To further extend access to these services, free blood tests were also made available throughout the following week at Thumbay Labs, enabling community members to benefit beyond the on-campus event. Through this initiative, Ajman University mobilized its institutional resources, on-campus facilities, medical services, and healthcare partnership to improve community access to preventive screening and health information. The health awareness component provided opportunities for participants to strengthen their understanding of preventive healthcare, personal health monitoring, and healthy lifestyle practices, supporting informal learning beyond formal educational settings. The initiative demonstrates Ajman University's commitment to sharing resources for public benefit by making healthcare services and health education accessible without charge. By combining free healthcare access with health education, Ajman University extends its institutional capabilities beyond their enrolled population to generate measurable community benefits and promote a healthier, better-informed society.

Ajman University Promotes Public Health Literacy and Lifelong Learning through Community Breast Cancer Awareness Programme

In October 2025, Ajman University Female Student Council organized a community-based breast cancer awareness workshop at Woodlem British School to expand access to health education and preventive healthcare awareness among high school students. The initiative created an inclusive learning environment that promoted health literacy for all, community outreach, youth empowerment, preventive education, and lifelong learning opportunities beyond the university campus. Through interactive educational activities and awareness sessions, students gained access to evidence-based health information that supports informed decision-making and encourages long-term healthy lifestyle practices. This initiative strongly demonstrates Ajman University's commitment to inclusive education, knowledge transfer, social impact, and community engagement, while strengthening partnerships between higher education institutions and schools to build a more health-conscious and informed society.

Ajman University offers free dental treatment to all patients in University Clinics as well as through Mobile Dental Clinic

Continuing in the year 2025, Ajman University's College of Dentistry promotes accessible public resources, sharing health education and lifelong learning through its free dental services, clinical resources, and experiential clinical education. Its university dental clinics and Mobile Dental Clinic provide comprehensive dental treatment free of charge, reducing financial barriers to oral healthcare and improving access to essential health services. Over the past decade, the clinics have served patients, demonstrating sustained community reach and public benefit. Modern dental facilities, laboratories, audio-visual learning technologies, and advanced clinical equipment support practical education, skills development, and evidence-based practice. Clinical cases also strengthen student competencies, research, and professional development. Through free accessible dental care and community-oriented health education, the initiative supports oral health awareness, preventive care, knowledge sharing, clinical learning, and the development of future-ready dental professionals.

Ajman University Shares Educational Resources and Accessibility Training to Promote Lifelong Learning and Inclusion

In October 2025, Ajman University's Center for Inclusive Learning organized a training programme titled Feel the Language for administrative staff, delivered by AU alumna a person of determination. Through this initiative, the university mobilized its institutional educational resources, staff development opportunities, and specialist knowledge to strengthen accessibility and promote inclusive learning within the university community.

The programme introduced participants to the fundamentals of Braille reading and writing through interactive activities and practical exercises. Participants learned how letters, numbers, and symbols are represented through raised dots and explored the practical application of Braille in everyday communication and educational settings. The session also covered effective communication with people who are blind or visually impaired, highlighting verbal and tactile communication methods and the importance of removing barriers to participation.

By providing staff with free access to practical resources, accessibility training, and inclusive education expertise, Ajman University invested in knowledge sharing and continuous professional development. The training equipped administrative staff with skills to improve services for students with disabilities and contribute to a more accessible and equitable educational environment. It also demonstrated how the university can use its institutional resources and the expertise of its alumni to extend learning beyond formal academic programmes and strengthen a culture of lifelong learning.

Ajman University Promotes Lifelong Learning Through Humanitarian Awareness and Community Engagement

The Office of Community Engagement, in collaboration with Al Etihad Charity Foundation, organized a humanitarian initiative to prepare and pack relief boxes in support of people in Gaza. Volunteers actively participated in assembling and packing the boxes, gaining practical experience through community service while developing an understanding of humanitarian needs, empathy, and social responsibility. The initiative provided an opportunity for experiential learning beyond the classroom, encouraging volunteers to develop values and skills that contribute to lifelong learning and responsible citizenship.

Ajman University Shares Educational Resources and Oral Health Knowledge with School Communities

Ajman University extends access to educational knowledge and practical learning resources beyond its campus by supporting local school communities through oral health education and the distribution of oral care kits. This initiative reflects the university's commitment to making educational resources and expertise available to learners who are not enrolled at the institution. As part of the initiative, Ajman University students visited local schools to provide educational sessions on oral hygiene, proper dental care, and the importance of maintaining healthy teeth and gums. Through these sessions, schoolchildren gained access to health-related knowledge and guidance designed to encourage informed decisions and healthy daily habits.

Ajman University also distributed oral care kits to participating schoolchildren, providing practical resources to complement the educational sessions and help them apply the knowledge shared with

general public. By combining educational guidance with oral care materials, the initiative extended the benefits of lifelong learning directly to the wider community.

Ajman University further contributed its human resources through student participation and volunteering. Students dedicated their time, knowledge, and skills to delivering educational activities outside the university, while their volunteer hours were recorded to document their contribution. This engagement demonstrates how university resources and student expertise can be mobilized to support learning and community development.

Through the sharing of educational knowledge, practical oral care resources, and student volunteer support, Ajman University helps extend learning opportunities beyond its enrolled student population. The initiative supported and promoted access to knowledge and educational resources for the public. The initiative illustrates Ajman University's role in connecting with public needs and using its educational resources to support lifelong learning, awareness, and healthier practices among the community.

Ajman University Hosts Coding Battle 2025 to Promote Lifelong Learning Through Sharing Knowledge and Campus Resources

Ajman University's IT Club, under the College of Engineering and IT, organized Coding Battle 2025 in collaboration with the Office of Student Life as an experiential learning initiative to promote continuous technical skills development. The activity engaged **81 students** across **27 teams** in **two (2) structured rounds of coding challenges**, providing opportunities to apply and enhance programming proficiency, problem-solving, coding efficiency, accuracy, and teamwork through practical, hands-on learning. The **top three (3) teams** received cash prizes and gifts in recognition of their technical performance and achievements. Supported by Dubai Police and the Council of Dubai Police Colleges and Universities, and sponsored by Lavish Perfumes (Gold Sponsor), FITNATION GYM, and Zaka Ambassadors, the initiative encouraged students to extend their learning beyond conventional classroom instruction and engage in applied skills development. By offering an organized opportunity for students to strengthen and apply their knowledge, Coding Battle 2025 contributes to Ajman University's commitment to lifelong learning and equitable access to learning opportunities.

Ajman University Shares University Resources for Free to Support Lifelong Learning and Community Engagement

In November 2025, Ajman University, through its Athletics Unit at the Office of Student Life, collaborated with the Emirates Red Crescent in Ajman to organize Together We Create Happiness, a community initiative for orphaned children held at the University Sports Complex. By providing free access to its sports facilities, campus resources, staff supervision, and student volunteer expertise, Ajman University extended the use of its institutional resources beyond its enrolled student population to benefit the wider community.

The initiative offered children opportunities to participate in sports activities, movement competitions, group games, face paintings, and interactive entertainment in a safe and inclusive university environment. Through these activities, the children experienced informal learning, physical activity, social interaction, teamwork, and personal development. The participation of university students from various sports teams and the Ajman University Youth Council further encouraged volunteering, community engagement, and the practical application of social responsibility.

By opening its sports facilities and mobilizing its human resources at no cost to participants, Ajman University demonstrated how university infrastructure and expertise can be shared as public-facing resources that support inclusive learning and community well-being. This initiative particularly contributes to the lifelong learning agenda, by creating opportunities for learning and personal development outside formal educational settings and making university resources accessible to children who may otherwise have limited access to such facilities and experiences. Through “Together We Create Happiness,” Ajman University illustrates the social value of providing free community access to university resources, reinforcing its role as an active partner in lifelong learning, inclusive community development, and sustainable social impact.
